

G2J was selected to represent France at the G20

50 entrepreneurs were selected from over 700 candidates to be the flag carriers of the French entrepreneurial ecosystem this year. They were selected according to several criteria, but with one main word: diversity!

The 50 entrepreneurs will participate to the G20 summit, to be held in Nice, from October 31 to November 2, 2011. Among them, José Gustave Jacques, G2J founder and CEO!

The G20 French Delegation of entrepreneurs

The third summit of the G20, supported by Nicolas Sarkozy and former Minister of Economy, Finance and Industry, Christine Lagarde, will gather political leaders, delegations of entrepreneurs from the 20 member nations of the G20 (400 delegates) during the three days preceding the G20.

With their experience, entrepreneurs will have the mission to promote and improve understanding of the vital role played by entrepreneurs in the economies of the G20 member nations, and to identify key joint actions that governments could implement in order to encourage entrepreneurship. These actions will be presented in a final statement.

Congratulations to G2J and to all the entrepreneurs, members of the French delegation!

About G20 Young Entrepreneur Summit:

The G20 Young Entrepreneurs' Alliance is a global network of young entrepreneurs and the organisations that support them. It has been established to convene each year in advance of the G20 Summit with the aim of championing the importance of young entrepreneurs to the G20 member nations and to share our own examples and practices.

About G2J :

With a pedigree stretching back to 1994, G2J is the only French videoconferencing specialist that is able to offer a full range of services – helping you to set up remote meetings simply and securely all over the world, whatever your access method and your equipment.

***Public institutions** (G8, FMI), **SMEs** (Boursorama, Somfy), **major corporations** (Auchan, Arcelor, EDF) in **all sectors** use G2J to **guarantee** that their videoconferences run without a hitch, while delivering the necessary **security** and **quality**.*

G2J, it is 3500 managed endpoints, 300 000 users a year, 4500 videoconferencing and telepresence rooms all over the world and 253 000 tons of CO2.
