

## G2J achieves Cisco ATP - TelePresence Video Advanced Partner Certification.

On July the 29<sup>th</sup> of 2011, G2J earned the designation of Cisco ATP - TelePresence Video Advanced Partner . This helps ensure that G2J sales and support organizations are better prepared to properly sell, design, install, and support the ATP program specific technology and products.

This is good news for enterprise and government customers in a world where video collaboration becomes more widespread and integrated in day-to-day business. The new certification is an important accomplishment for G2J and demonstrates its desire to develop expertise in the videoconferencing and telepresence market. It demonstrates that G2J is continually improving service and support levels to its customers by investing in sales, technical, and lifecycle services capabilities that help customers implement complete videoconferencing and telepresence solutions.

Sebastien Bonnaire, Infrastructure Manager at G2J

« For many years, G2J has been providing a range of videoconferencing services for the sole purpose of allowing each user to enjoy all the benefits of video communication without dealing with both financial and technical constraints. Recognized by its clients and partners for its quality of service, G2J must confirm it by obtaining certifications. It is in this context that G2J was certified Cisco ATP Advanced Partner , thereby proving that its teams of experts are better able to advise companies and public institutions regarding Cisco Visual Communication offer. "

Through this certification process, G2J is pursuing a deep transformation of its business model by putting users at the heart of its efforts. From a "technology centric" organization, G2J is gradually moving towards a "user centric" model, oriented towards quality of service and customer satisfaction. The next step planned is that of obtaining the highest level of certification awarded by Cisco, The ATP Master level certification.
